DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 26, 2007 has been entered.

Claim Objections

2. Claim 43 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. In particular, it is noted that claim 43 depends from claim 40, but claims 40 and 43 both recite the same structural limitation.

Allowable Subject Matter

3. Claims 38-42 and 44-55 are allowable. The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not disclose or adequately suggest the claimed polyester manufacturing apparatus, wherein the apparatus comprises a third reactor for producing a high molecular weight polyester that is polymerized to a higher degree than the low molecular weight polyester produced in a second reactor; the third reactor, in particular, being provided with a stirring rotor having the instantly claimed structure, including scraping vanes disposed on the plate portions in the adjacent disks of the high viscosity side of the stirring blocks, the scraping vanes extending

discontinuously to the adjacent disk and being alternately arranged on the one disk and on another adjacent disk respectively such that a track of one scraping vane on one disk overlaps that of one scraping vane on another adjacent disk, when these disks are rotated.
